

Ladle Weigh Modules

Description:

Weigh modules are designed to fit into existing ladle stands, turret arms and transfer cars. Modules can be easily exchanged with spare calibrated modules and taken to repair bays for repair and calibration.

Specifications:

- Flexure plate checking system
- Floating load cell bearing assemblies
- Double-ended shear beam load cells
- Digital weight instrument
- Floating ladle locator buttons
- 550 deg F. load cells

Options:

- R.F. radio data transmission to remote locations
- Remote calibration through R.F. radio
- Scoreboards, printers, computer interfaces
- Custom batching programs
- Hydraulic calibration repair stand
