

TWS Alloy Additive System

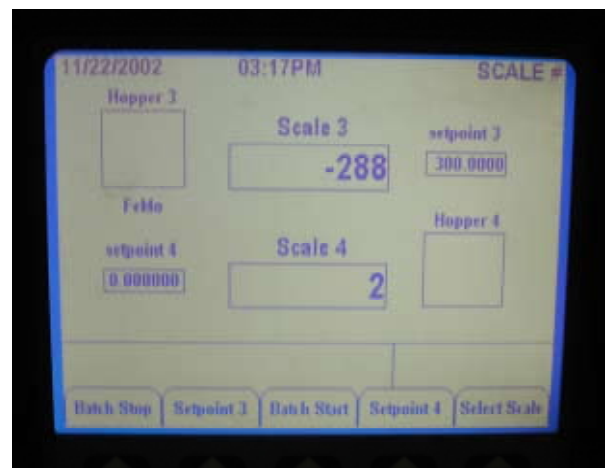

In the competitive mill environment, accuracy is the key. Technical Weighing Services provides a fast and accurate way to add alloys to each heat. The system is built mill duty and proven in the industry.

Four Hopper Alloy Additive System shown

FEATURES:

- Super sack or bulk loading
- Accurate and durable weigh hoppers
- Remote control from pulpit
- Belt conveyed into the ladle
- Pneumatic or hydraulic controlled gates
- PLC control software options
- Built in super sack cutter
- Custom designed to application
- Other systems available:
Lime Additive, Carbon Injection, Tap Hole Sanding, Transfer Cars, Conveyors, Storage Bins
