

TWS Mini Floor Scales

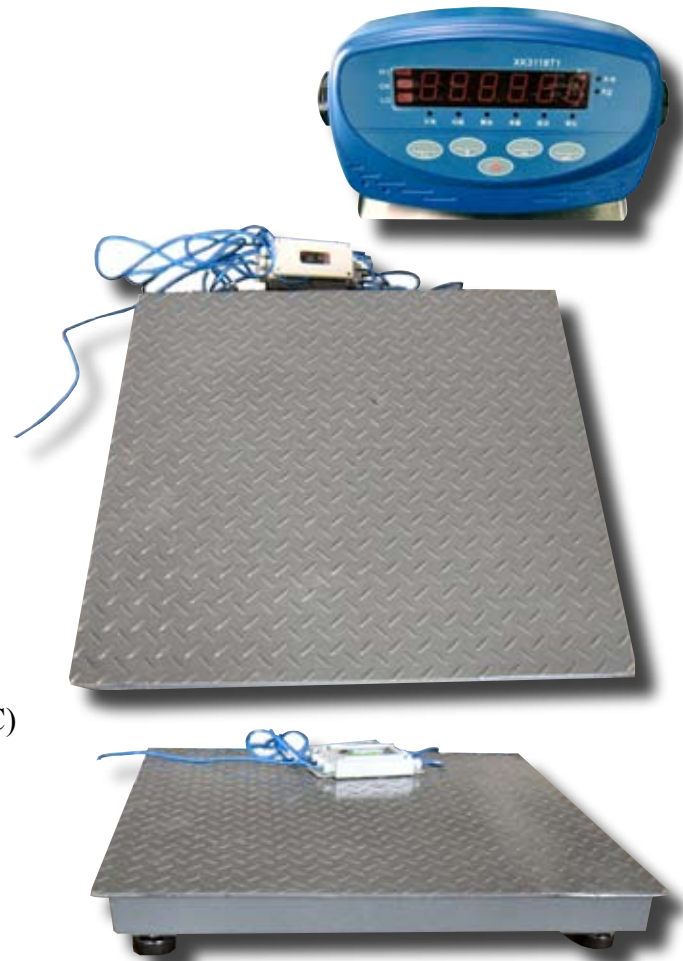

TWS minitype floor scales employ a new, steel construction, weight bearing unit design, that can be transported simply and conveniently. A combination of moveable ramps and the ability to be placed directly on cement floors, the scales make full use of valuable space. The weighing system includes four (4) load cells and weight indicator equipped with high accuracy, rapid weighing and superior durability. The system is ideal for weighing small loaded vehicles.

FEATURES

- Construction function and character
- Low platform construction design
- Reasonable and reliable frame construction
- Flat or web steel accuracy welding
- Steel surface with oxygen drying paint
- Rust resistant
- Weight can load from any direction
- Loading ramps (optional)

SPECIFICATIONS

Accuracy Class:	OIML-III
Weighing Capacity:	up to 10,000 lbs.
Working Temperature:	
Indicator:	32 - 104 deg F (0 - 40 deg C)
Platform & Cells:	-4 - 140 deg F (-20 - 60 deg C)
Safe Overload:	150%
Humidity:	<90%
Working Power:	110VAC
Range of Voltage Wave:	-15% to +10%
